

## ACTA STEREOLOGICA

CONTENTS	Page
<b>Editorial, Y. Collan</b> .....	1
<b>Scope and concepts of quantitative pathology, Y. Collan, T. Kuopio, K. Alanen</b> .....	3
<b>Quantitative nucleology: The quantitative aspects of the study of nuclei, W.F. Whimster</b> .....	25
<b>Stereology in human morphology, M. Kališnik</b> .....	35
<b>Three-D computational geometry: The pattern of vasculature in normal and diseased livers as expressed by the distribution of distance in space, T. Takahashi, T. Kikuchi, T. Chiba</b> .....	41
<b>Experiences on the use of the disector principle in neuropathology, Y. Collan, S.Y. Ma, M. Róyttä, T. Kuopio, J. Rinne, U.K. Rinne</b> .....	51
<b>Shape descriptors in diagnosis, M. Oberholzer, M. Oestreicher, M. Brühlmann, M. Hubler, H. Christen, R. Gschwind</b> .....	63
<b>Quantitative methods in histopathology: Evaluation of their prognostic power in infiltrating ductal breast carcinoma, S. Sisti, A. Santinelli, M. Valli, R. Taborro, B. Mannello, G. Mariuzzi</b> .....	79
<b>Volume corrected mitotic index (M/V index) in ovarian cancer, H. Haapasalo</b> ..	89
<b>S-phase fraction analysis in DNA static cytometry in breast cancer. Comparison with proliferating cell nuclear antigen (PCNA) immunostaining, R. Montironi, L. Diamanti, C. Magi Galluzzi, F. Mangili, A. Cantaboni</b> .....	99
<b>Quantitation of AgNORs in urothelial cancer - Evaluation of diagnostic parameters in histology and cytology, J. Rüschoff, A. Bittinger, A. Gogolok, A.v. Keitz, B. Ulshöfer</b> .....	109
<b>AgNORs and PCNA immunoreactivity in early and advanced gastric carcinoma, I. Bearzi, R. Ranaldi, B. Rezai, C. Sassaroli, B. Mannello</b> .....	119
<b>Simple quantitation of immunohistochemical staining positivity in microscopy for histopathology routine, P.K. Lipponen, Y. Collan</b> .....	125
<b>International doctorate program in quantitative diagnostic pathology, P. Tosi</b> .....	133
