

## SUBJECT INDEX

A

Antigen, carcinoembryonic, 347  
 Asymmetry, 269, 297  
 Automated analysis, 341  
 Autoradiography, quantitative, 235

B

Bat, 129  
 Biopsies, 341  
 Biotin, 137  
 Blood vessels, 279  
 Boundary dilation method, 79  
 Brain, 279, 289

C

Capillary, 309  
 Cells, 199, 335  
 Cell suspensions, 123  
 Classification method, 79  
 Cluster analysis, 137  
 Computer, 259  
 Computer graphics, 289, 297  
 Computer programs, 73  
 Computer simulation; 37, 51, 89  
 Convex sets, 61

D

Data treatment, 227  
 Diagnosis, 141  
 Differentiation, 335  
 Distribution, diameter, 45  
 Distribution, frequency, 51  
 Distribution, size, 269

Distribution, size-shape, 211  
 Distribution, spatial, 279  
 Distribution, sphere size, 205  
 Distribution, stationary, 45

E

Electronmicroscopy, 123, 329  
 Epithelium, 335  
 Epithelium height, 129  
 Evolution, 241

F

Fish, 309  
 Follicular genesis, 329  
 Fractal dimensions, 79  
 Fracture, 79  
 Fracture surface, 89

G

Golgi apparatus, 329  
 Grains, 37  
 Granules, neurosecretory, 323

H

Hibernation, 129  
 Horseradish peroxidase, 253

I

Image analysis, 279  
 Immunohistochemistry, 347  
 Information processing, 241  
 Instrumentation, 73  
 Intensity conservation, 45

Intercept, 51, 187  
Intercept method, 79  
Iron, cast, 103

L

Laser beam, 199  
Lattice test, 187  
Light microscopy, 67  
Liver, 67

M

Materials, tailor-made, 5  
Melanin granules, 211  
Membrane receptors, 235  
Microcomputer, 227, 235  
Microstructure property equations, 5  
Microvesicles, 323  
Morphometry, 73, 141, 347  
Morphology, 23  
Multiphase materials, 5  
Muscles, 253, 309

N

Nerve, sural, 341  
Neurohypophysis, 323  
Neurons, 235, 269  
Neurons, granular, 259  
Neurons, motor, 253  
Neurons, pyramidal, 259  
Non-planar surfaces, 89  
Nuclear volume, 129

O

Optimality, 241  
Organelles, motile, 199

P

Palate, hard, 335  
Parameters, microstructural, 5  
Pathology, 141  
Peroxidase method, 347  
Physiology, 23  
Point pattern analysis, 305  
Polydispersed particle systems, 51  
Polyhedra, pseudo Williams', 37  
Polyneuropathy, uraemic, 341  
Processing, 73  
Prisma, hexagonal, 51  
Prisma, pentagonal, 51

R

Random processes, 45  
Reconstruction, 227  
Respiratory system, 23  
Reticulum, smooth endoplasmic, 323  
Richardson's method, 79

S

Sampling, 187  
Sections, 67  
Sections, serial, 227, 289  
Sections, thin, 219  
Section thickness, 205  
Semiautomatic analysis, 103  
Shape parameters, 103  
Skewness, 241  
Sphere population density, 205  
Spheres, 219  
Spheroid, 211  
Statistical analysis, 79  
Structure-function correlations, 23  
Symmetry, 269  
Symmetry factor, 259  
Synapses, 269

T

Teaching, 141  
Teeth, 297  
Tetrakaidecahedron,  
    Williams', 37  
Thyroid gland, 129, 329  
Thyrotropin, 329  
Truncation, 219  
Tumours, ovarian, 347

V

Variation, biological, 241,  
    323  
Vasopressin, 323
