

ACTA STEREOLOGICA

CONTENTS	Page
STERMAT'94	
STERMAT'94 - IV International conference on stereology and image analysis in materials science, L. Wojnar	3
Stereological characterization of fibre dispersions in concrete, P. Stroeven, M. Stroeven	5
An enhanced model for the fibre pull-out and failure in thermoplastic composites, V. Beneš, Z. Kořinek, M. Postler	17
Conditional watershed segmentation for grain boundary reconstruction, E. Pirard, A. Delanaye	23
Quantitative characterisation of weld simulated structures in duplex stainless steel SAF 2205, J. Komenda, R. Sandström	29
Roughness investigation by mathematical morphology, M. Coster, G. Gauthier, J. L. Chermant	35
Evaluation of fracture roughness using two kinds of fractal dimension measurements, W. Meiqiang, U. Skands, K. Conradser	45
Importance of the processing route on the morphology of zirconia ceramics, J. L. Chermant, L. Chermant, M. Coster, T. Chartier	51
On the influence of reduction on the grain geometry in hot hydrostatic extruded brass samples, J. J. Bucki, M. S. Kozłowski, A. Mazur	57
On the correlation between distribution of CSL boundaries and grain geometry, A. Garbacz, B. Ralph, K. J. Kurzydłowski	61
Determination of 3D fiber orientations in reinforced thermoplastics, using scanning electron microscopy, L. Avérous, J. C. Quantin, D. Lafon, A. Crespy	69
Germ-grain model of short-fibre composites, K. Pelikán, I. Saxl, P. Ponižil	75
Stereological assessment of secondary carbide particles in nonledeburitic HSS using electron microscopy, J. Richter, J. Cwajna, J. Szala	83

MISCELLANIES

**Computer supported recognition of graphite particle forms in
cast iron, J. Grum, R. Šturm** 91

PERSONAL NEWS III

INSTRUCTION TO AUTHORS

ACTA STEREOL	VOL 14	NO 1	PP 1 - 96	LJUBLJANA	SEP 1995
